

Design a **Car Rental System** for a car rental agency that manages car availability, customer details, and rental charges.

Features:

1. **Car Management:**
 - o Add cars (car ID, model, type, rental price per day).
 - o Edit car details (model, type, rental price).
 - o Remove cars from the fleet.
2. **Customer Management:**
 - o Add customers (name, contact info, rental history).
 - o Edit customer details.
 - o Track customer rental history.
3. **Rental System:**
 - o Allow customers to rent cars (select car, rental period, insurance options).
 - o Calculate rental charges based on car type and rental duration.
 - o Apply discounts (e.g., 10% discount for rentals over 7 days).
4. **Invoice Generation:**
 - o Generate invoices showing car rental charges, insurance, and discounts.
5. **Report Generation:**
 - o Display the total earnings for the day.
 - o Show which cars are currently rented out.

Sample Input:

1. Add car:
 - o Car ID: "C101"
 - o Model: "Honda Civic"
 - o Type: "Sedan"
 - o Rental Price: \$50/day
2. Rent car:
 - o Customer: "Alice"
 - o Car: "C101"
 - o Rental Duration: 5 days

Sample Output:

Rental Confirmation:

Customer: Alice | Car: Honda Civic | Rental Duration: 5 days

Rental Price: \$250

Insurance: \$20

Total Bill: \$270

Car Fleet Status:

Car Honda Civic | Available for Rent: No
